

Anton Maryshchenko

Cybersecurity Student • Rzeszów, Poland

CONTACT

+48 536 910 122
carryratrotcat@gmail.com
a.maryshchenko@proton.me

PROGRAMMING

Bash, Python, SQL
(SQL Injection focus)

LANGUAGES

English — B2
Polish — B2
Ukrainian — Native

TOOLS

Wireshark, Nmap
Metasploit, Burp Suite
Nikto, Nessus
John the Ripper

EXPERIENCE

Practical knowledge of network protocols TCP/IP, DNS, DHCP, HTTPS.

CTFs & practical labs on TryHackMe, HackTheBox — covering privilege escalation and vulnerability exploitation.

Currently completing the Cybersecurity development path on Roadmap.sh.

Web security learning via PortSwigger Academy.

Practical use of cryptographic tools: symmetric/asymmetric encryption, hashing.

PROJECTS

Project SP — Enterprise Homelab

github.com/amaryshchenko/project-sp

Full red team / blue team attack simulation on a self-built virtual enterprise network.

- Built a 6-VM corporate network (Windows Server 2025, Windows 11, Ubuntu, Kali Linux) using VirtualBox with Active Directory, DNS, DHCP, and SSO.
- Deployed Wazuh SIEM for log ingestion, intrusion detection, and real-time alerting; experimented with Slack + Splunk integration for notifications.
- Executed a full kill chain: reconnaissance → credential brute-force (Hydra) → phishing (custom PowerShell reverse shell) → lateral movement → privilege escalation → data exfiltration (SCP) → domain persistence.
- Documented attack walkthrough with step-by-step evidence and detection analysis.
- Tools: Hydra, Evil-WinRM, NetExec, Metasploit, Nmap, Wazuh, SecLists.

EDUCATION

University of Information Technology and Management, Rzeszów

Higher Education | 2025 – Present

Mankivska ZZSO I–III Stopnia

Secondary Education | 2013 – 2025
